Re: Final Offer for Right of Way Purchase
Project: 201197; Liberty to Pittsfield
County: Pike
Section: 13; Parcel: 1035; Dan & Marsha Allen

Dear Mr. Hollahan,

Thank you for calling me back yesterday. As we discussed, PPI is now preparing to initiate Eminent Domain proceedings to acquire a Right of Way Easement on part of the above-described land.

Prior to filing legal proceedings to condemn the needed Right of Way Easement, we are presenting a final offer of \$11,100.00 in exchange for signing the enclosed Right of Way Easement and W-9. Such amount represents more than the fair market value of the land along with avoided expenses of condemnation.

Please let us know within ten (10) days of the date of this letter whether this offer is acceptable by having your clients sign (in front of a notary) and return the enclosed documents to the undersigned. A check will be mailed to you after receipt of the signed documents. If you have any questions, concerns, or would like to make alternate arrangements for payment or signing, please direct them to me at (217) 331-5624 or tjohansson@ppi.coop.

Sincerely yours,

A handwritten signature in black ink, appearing to read "T. Johansson", written over a horizontal line.

Right-of-Way Easement

Recorder of Deeds of Pike County, Illinois

KNOW ALL MEN BY THESE PRESENTS that **Daniel J Allen** and **Marsha L Allen**, (together with successors, assigns, and personal representatives hereinafter referred to as "Grantor(s)"), for good and valuable consideration, the receipt of which is hereby acknowledged, do hereby grant and convey unto PRAIRIE POWER, INC., an Illinois not-for-profit corporation, and its successors and assigns (hereinafter referred to as "Grantee"), the right:

(1) to enter upon the real estate of the Grantor(s) described as follows:

A tract of land lying in and being a part of the Northeast Quarter of Section 13, Township 4 South, Range 4 West of the Fourth Principal Meridian, PIKE COUNTY, ILLINOIS, and being more fully described as follows:

COMMENCING at a point marking the Northeast corner of the Northeast Quarter of the aforementioned Section 13; thence South 00 Degrees 37 Minutes 56 Seconds West along the East line of the Northeast Quarter of said Section 13 a distance of 669.60 feet to the Northeast corner of the South Half of the Northeast Quarter of the Northeast Quarter of said Section 13, said point also being the POINT OF BEGINNING; thence continue South 00 Degrees 37 Minutes 56 Seconds West along said East line a distance of 669.60 feet to the Southeast corner of the Northeast Quarter of said Northeast Quarter; thence South 87 Degrees 42 Minutes 05 Seconds West along the South line of the Northeast Quarter of said Northeast Quarter a distance of 75.70 feet; thence North 03 Degrees 08 Minutes 59 Seconds East leaving said South line a distance of 281.53 feet; thence North 00 Degrees 03 Minutes 07 Seconds East a distance of 388.68 feet to a point on the North line of the South Half of the Northeast Quarter of said Northeast Quarter; thence North 87 Degrees 36 Minutes 12 Seconds East along said North line a distance of 67.27 feet to the POINT OF BEGINNING; CONTAINING 1.03 Acres more or less; the parent tract for the above described is recorded in Book 834 at page 104 as recorded in the Pike County Recorder of Deeds office; as per survey during March of 2018 of JEFF C. HART, ILLINOIS PROFESSIONAL LAND SURVEYOR #35-3461, as further described in Exhibit A attached hereto and incorporated herein.

(2) to excavate, place, bury, construct, operate, patrol, inspect, repair, maintain, relocate, and replace on, above, over, in, through, and under said real estate and all streets, roads, or highways abutting said real estate an electric system, including, but not limited to, poles, structures, cross-arms, wires, cables, conduits, fiber-optic cables and equipment, markers, and other components or appurtenances (collectively the "electric system"). To the extent field and safety conditions allow, initial construction of poles will be

in locations identified in Exhibit B. After final engineering design and construction has been completed, Grantee shall record as built drawings showing the location of the installed poles;

(3) to remove, using any means typically used by electric utilities, including, but not limited to, machinery, cutting, trimming or chemical means, trees, shrubbery, brush, or other vegetation to the extent necessary within 50 feet of the centerline of the wires conducting electricity to keep them clear of said electric system;

(4) to cut down and remove from time to time all dead, weak, leaning, or dangerous trees and other obstructions that are tall enough to strike or endanger the electric system, or any of its lines, wires, or components; and

(5) to license, permit, or otherwise agree to the joint use or occupancy of the electric system by any other person, association, corporation, or entity for electrification purposes.

Nothing contained in this Right-of-Way Easement shall limit the Grantor(s) from using the described real estate for any lawful purposes, including, but not by way of limitation, for the grazing thereon by livestock, or other use, so long as any such use shall not in the reasonable opinion of the Grantee endanger any part of said electric system, or create a hazardous condition, or interfere with the safe use and enjoyment of the said lands for the uses and purposes hereinabove granted to the Grantee.

After initial construction and if safety, engineering, service, or reliability constraints dictate, the Grantee shall have the right, from time to time, to relocate all or any portion of the above described electric system at any one or more locations and install additional poles, structures, lines, and other components or appurtenances within the above-described real estate, all at such time and times as the Grantee in its discretion shall deem appropriate. The expense of such relocation and installation shall be the expense of the Grantee. The Grantee agrees that it shall use reasonable efforts to locate poles and other above-ground structures so as to cause the least possible interference with lawful use of the property, so long as such locations do not materially increase the cost of construction, operation, repair, maintenance, relocation or replacement of the electric system or any portion thereof.

The Grantee agrees that it shall pay the fair and reasonable amount of any damage caused to crops, fences or other property of the Grantor(s) caused by the Grantee during construction, operation, inspection, repair, maintenance, relocation or replacement of the electric system.

The Grantor(s) represent that the above-described premises are rented for the period beginning _____, _____, to _____, _____, on (cash) (crop shares) to _____.

The Grantor(s) agree that all poles, structures, cross-arms, wires, cables, conduits, fiber-optic cables and equipment, markers, and other components and appurtenances shall remain the property of the Grantee, removable at the option of the Grantee.

The Grantor(s) covenant and agree that no structure, building, or fixture shall be placed over underground conduits, wires or lines and no structure, building, or fixture shall be constructed, erected, or maintained within the above-described real estate.

Exceptions or restrictions to the foregoing grant of the easement are as follows: **Distribution service will be underbuilt on the transmission facility; no guy wires.**

said instrument, for and on her/his behalf as her/his free and voluntary act for the uses and purposes therein set forth.

Given under my hand and notarial seal this _____ day of _____, 20____.

Re: A 20.77± acre farm located in Section 13, Township 4 South Range 4 West
Pike County, Illinois

Dear Ms. Johansson:

As per your request, I conducted a study of the above captioned property for the purpose of estimating the Market Value of the fee simple estate, the value of the part taken, damages and/or benefits to the remainder, along with compensation for any easements. The values presented in this report are not complete without reading of the entire report including the certification and limiting conditions. Submitted herewith, is a report of my findings and conclusions. It is my intent that the appraisal service is to be performed in such a manner that the results of the analysis, opinion, or conclusion be that of a disinterested third party. This report is intended to be a Appraisal Report as defined in the Uniform Standards of Professional Appraisal Practice. It is my intent that the appropriate data deemed pertinent to the solution of the appraisal problem be collected, confirmed, and reported in conformity with the Uniform Standards of Professional Appraisal Practice and the Code of Ethics of the Appraisal Institute.

SPECIAL NOTE: Due to the methods of measuring the subject and the comparables used herein the sizes set forth in various plats vary slightly. For instance the size of the subject in the legal description (Survey) is slightly different than the size reported by AgriData, Inc, which is slightly different than the size provided by Acre Value. These three methods are different based on field sizes versus measured survey data. In my opinion, these slight differences do not significantly influence the appraised value of the subject property or any of the value conclusions set forth within this report.

This appraisal is of the value of the real estate only and does not include personal property, fixtures, or intangible items that are not real property. The extent of the work and the size of the report are intended to be appropriate in relation to the significance of the appraisal problem. To the best of my knowledge, the statements contained in this report are correct. The limiting conditions and assumptions are set forth.

During the appraisal process I contacted the owner and offered to meet with him and/or discuss the property with him. He declined my offer. Based on my off site inspection of the property, and as a result of my analysis, it is my opinion that the values pertaining to the subject property as of May 24, 2018. (The date of my original visit) are as follows:

Market Value of the Whole Property Before the Imposition of the Easement	\$78,000
Market Value of the Easement Area as it Contributes to the Remainder Property Before the Imposition of the Easement	\$3,900
Market Value of the Easement Area as it Contributes to the Remainder Property After the Imposition of the Easement(s)	\$2,900
Diminution or Change in Market Value of the Easement Area	\$1,000
Market Value of the Remainder Property Outside of the Easement Area Before Imposition of the Easement	\$74,100
Market Value of the Remainder Property Outside of the Easement Area After Imposition of Easement	\$74,100
Diminution or change of Market Value of the Remainder Property Outside the Easement Area Due to Imposition of the Easement	\$0
Temporary Damages Within The Easement Area	\$275
Total Compensation for Easement	\$1,275

Respectfully Submitted,

Charles R. Johnson, MAI
